# Onwerk GmbH

## Software Development Company

- Software From Ideas -

Company presentation

## Our field of competences

- Development of Windows Software: Desktop & Server  
interactive with user interface & automated programs/tasks
- Development of Web-based systems  
focus on technology, not on content. No „plain“ homepages / CMS
- Development of Smartphone & Tablet Apps  
iOS, Android, Windows Phone, Web-Apps

## Our offer

- Technical consulting  
Best composition of different technologies – always fitting the project needs
- Consulting, Positioning, Determining the target audience
- Requirements, Specifications, Software architecture
- Software development, Quality assurance
- Test, Rollout
- Second Level Support, After-Sales-Support  
(Statistics, Software Inspection Service, Maintenance)

## Our principles

- Focus on customer goal instead of focus on software  
Goal of customer is usually a solution. Not the software itself
- Transparency throughout the project without restrictions  
Constant monitoring and communication of costs and deadlines
- Honesty, fairness and reliability with no compromises
- Software development according to highest standards  
Meeting all modern requirements
- „Developing software we are proud of!“

- Core competence: Software development & Usability
- Focus on the benefit and the value of the software
- Strong regional identification and integration  
Reliable base for an intensive, quick and personal consulting
- Excellent network of local partners  
to offer services in graphic design, marketing and advertisement
- Committed to the highest quality standards  
Always state-of-the-art
- Successfully since 2001

## Our team

- Owner-managed company  
(Both CEOs are computer scientist with over 20 years of experience)
- Highly qualified employees  
(Computer scientists and related professions)
- No outsourcing, offshoring, near shoring
- Personal contact for every project
- Currently 12 team members

## Our customers

- Mostly medium-sized business and enterprise business
- All kinds of industry sectors  
Industry, automation, travel, franchise services
- Some of our reference customers:

- Software development on highest quality level
- Software development with cutting edge technologies
- Continuing training
- Up-to-date methods for project management  
SCRUM, agile methods
- Established, highly effective quality management  
Well-defined Development Life Cycle, Continuous Integration  
and Continuous Deployment

# Looking forward to meeting you and your ideas!
